

HOW TO MEASURE A FRAME FOR SEG FABRIC.

24" x 24" SEG frame

Left side

Right side

- DVC prefers to be supplied the outer dimension (OD) to set our house frame for exact test fitting.
- Place a tape measure on the outer edge of the left side of the frame and measure to the outside of the frame on the right side to get the OD.
- Make sure to measure the OD of both the width and height.
- **PLEASE** measure accurately as fabric graphics look best when they fit properly.
