SUSTAINABILITY INITIATIVES

At DVC, we believe that sustainability is a continuous improvement for all areas of our operation. Implementing best practices to reduce energy, waste and toxic materials is at the top of our minds. Researching new and innovative technology is also what we do.

The following list demonstrates how DVC helps to protect the well being of our natural environment and people.

- FSC certified printer
- Use of FSC certified paper stock
- Use of water-based inks for 10' wide dye-sublimation printing
- Use of water-based inks for 10' wide flexible substrate printing
- LED curing technology for our UV printers
- Use of PVC free print substrates
- Recommendation of sustainable substrates to our clients
- Energy conservation
- Recycle bins
- Hybrid delivery vehicle
